

Provided with linear pulse encoder

- Combination with a computer or an electronic counter ensures high-accuracy position control and position detection.
- Since a permanent magnet is used for the length measuring roller for detection of distance, the length measuring accuracy is improved.
- Resolution : 0.1 mm/pulse

- The cushion stroke lengths in case of cylinders used up to the stroke end.
- In the case that a cylinder is not used up to the stroke end, and it is stopped 5 mm or more before the stroke end, the cushioning effect will be weakened. In such a case, consult us.

Terminologies

Nominal pressure
Pressure given to a cylinder for convenience of naming. It is not always the same as the working pressure (rated pressure) that guarantees performance under the specified conditions.

Maximum allowable pressure
Maximum allowable pressure generated in a cylinder (surge pressure, etc.).

Proof test pressure
Test pressure against which a cylinder can withstand without unreliable performance at the return to nominal pressure.

Minimum operating pressure
Minimum pressure at which cylinder installed horizontally operates under no load.

- Notes) ● The hydraulic pressure generated in a cylinder due to the inertia of load must be lower than the maximum allowable pressure.
- For the internal structure, refer to the sectional drawings at the end of this catalog.
 - Slipper Seal is the registered trade mark of Nippon Valqua Industries, Ltd.
 - Conex is the registered trademark of Teijin Limited.

Product Lineup

- Notes) ● When using a sensor, use a Switch Set Cylinder.
● No sensor can be mounted onto the standard type cylinder.

PQCPA Series dedicated to analog pulse output position sensing cylinders

- Environmentally-friendly lead-free indicator
- Analog input and pulse input types are available.
- Provided with multi-point output function (5 points) as a standard function to enable to individually set the upper and lower limits Note 1)
- A 16-bit AD converter is provided to realize high resolution. (Analog input type)
- Provided with a counter with a response frequency of 200 kHz (Pulse input type)
- Provided with a pulse position correcting function Note 2)

Note 1) Setting the bank switching enables to use the multi-output function of up to 15 points.

Note 2) Position correction can be made by mounting a cylinder sensor. Positional error caused by slippage of the encoder is eliminated.

Dimensional Drawings

Supplied connector

● CN1 connector (for input of measuring sensor signal)

● CN2 connector (for output of measuring sensor signal)

● CN3 connector (for control input/output)

● CN4 connector (for power supply)

* When fitting the connectors, keep a space of at least 200 mm at the rear.

How to order **Discontinued**

How to order cable between sensor and indicator

- * When ordering a cable, confirm the series name of the actuator on the sensor side. Some models cannot be connected.
- * After wiring, connect the indicator side connector to the CN1 connector on the indicator.

PQCPA-CV1-Cable length

Applicable actuators : PTH-1B/PTN-1B/PTT-1B

PQCPA-CV2-Cable length

Applicable actuators : 35P-3/70P-8/140P-8

PQCPA-CV3-Cable length

Applicable actuators : PSR-1A

Note) PSR-1A comes with a 2-m cable as a standard accessory. If another cable is required, select this cable. (In this case, disconnect the standard cable (2m) of PSR-1A, and connect the selected cable directly to the amplifier.)

How to order I/O cable

PQCPA - IO

* The I/O cable is 5m long.

CN3 half-pitch connector
Note) Only the CN3 half-pitch connector is supplied as a standard accessory. If you need the connector with a cable, place an order for the connector.

Rod End Attachment

● Rod eye (T-end)

● Rod clevis (Y-end) with pin

● Floating joint (F-end)

- Notes ● The insertion of the floating joint into the socket shall not equal or exceed the dimension of screw diameter. (Return the joint one or two turns after it gets into contact with the socket bottom, and fix it with a lock nut.) Excessive insertion can cause operation failure.
- DO NOT use together with CT accessory.
 - The lock nut is indispensable in using the floating joint. Please don't miss to order the lock nut with the floating joint.
